

IF YOU'RE NOT LIFTING SHEETROCK® ULTRALIGHT PANELS, WHAT ARE YOU LIFTING?

Introducing SHEETROCK® UltraLight Panels FIRECODE® 30

Up to 30% lighter than standard 5/8" type X panels, SHEETROCK® UltraLight Panels FIRECODE® 30 are an optimized solution for non-rated and 30-minute partitions. These lightweight panels are easing the burden for an entire industry.

Another first from CGC, The Leader in Lightweight Innovation™.

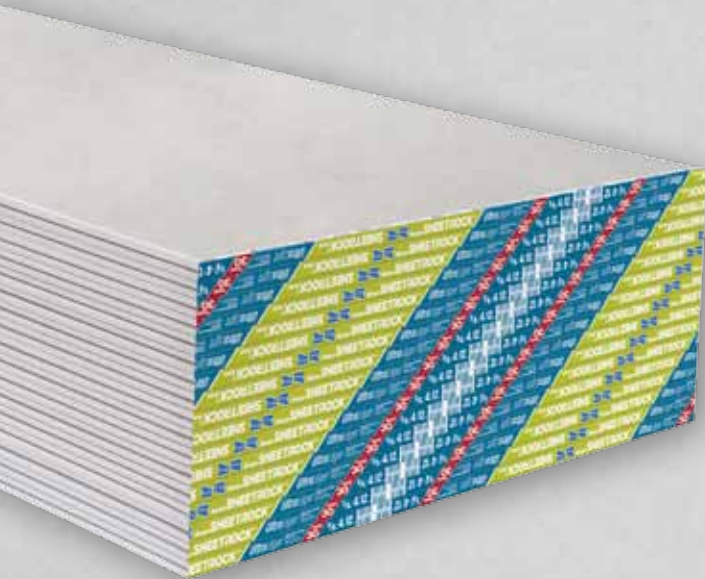

Outstanding Performance:

- An optimally designed lightweight alternative to standard 5/8" type X panels*
- Easier to carry, score, snap and install
- cUL Classified and ULC Listed for use in 30-minute single-layer wood- and steel-framed assemblies and one-hour double-layer steel-framed assemblies (UL design U407 and ULC design W496)
- Strength and impact resistance is comparable to standard 5/8" type X gypsum board
- Meets or exceeds ASTM C1396 and building code requirements for 5/8" gypsum board (non-type X)
- Contains up to 95% postindustrial recycled content and qualifies as a low VOC emitting material

THE WEIGHT HAS BEEN LIFTED

Introducing SHEETROCK® UltraLight Panels FIRECODE® 30

- Up to 30% lighter than standard 5/8" type X drywall
- An optimally designed lightweight alternative to standard 5/8" type X panels*
- Easier to carry, score, snap and install
- cUL Classified and ULC Listed for use in 30-minute single-layer wood- and steel-framed assemblies and one-hour double-layer steel-framed assemblies (cUL design U407 ULC design W496)
- Strength and impact resistance is comparable to standard 5/8" type X board

“With regular 5/8", I need to take Advil at the end of the day. With FIRECODE® 30, I don't have to.”

— *Journeyman Installer*

“We went back to the general contractor with a change order request because we believe SHEETROCK® FIRECODE® 30 offered safety benefits for our installers.”

— *Drywall Subcontractor, Owner*

“Anytime you can go lighter in the construction industry, guys will love it.”

— *General Contractor, Owner*

“It's better for installers, better for us and I think we'd do faster work.”

— *Drywall Subcontractor*
