

SAFETY DATA SHEET

October 2017

1. Identification

Product identifier Continental Drywall Products

Other means of identification

Product code

Firecheck® Type X, Firecheck® Type C, Green Board, Gypboard, LiftLite®, LiftLite® Firecheck 30, LiftLite® Type X, Mold Defense®, Mold Defense® Type X, Plasterbase, Firecheck® Plasterbase Type X, Protecta® AR 100 Type X with Mold Defense®, Protecta® HIR 300 Type X with Mold Defense®, Rapid Deco® Level Five, Rapid Deco® Level Five Type X, Rapid Deco® Level Five with Mold Defense®, Rapid Deco® Level Five Type X with Mold Defense®, Rapid Deco® Protecta® AR 100, Rapid Deco® Protecta® AR 100 with Mold Defense®, Regular Drywall, Sagcheck®, Shaft Wall Liner, Shaftliner Type X, Mold Defense® Shaftliner Type X, Weather Defense® Platinum Sheathing, Weather Defense® Platinum Sheathing Type X, Weather Defense® Platinum Interior, Weather Defense® Platinum

Interior Type X.

Recommended use Construction/Wall Applications

Recommended restrictions none

Manufacturer / Importer / Supplier / Distributor information

Supplier: Continental Building Products Operating Company, LLC

Address 12950 Worldgate Drive, Suite 700,

Herndon, VA 20170

Telephone 800-237-5505
Contact person Technical Manager
info@continental-bp.com

Emergency phone number 24/7 Hotline: USA/Canada - 1.855-243-2286 (access code: 14451)

2. Hazard(s) identification

Physical hazardsNot classified.Health hazardsNot classified.Environmental hazardsNot classified.OSHA defined hazardsNot classified.

Label Elements

Hazard Symbol None.
Signal word None.
Hazard statement None.
Precautionary statement None.

3. Composition/information on ingredients

Mixtures

Chemical name	CAS number	%
Gypsum	13397-24-5	70 - 90
Cellulose	9004-34-6	0 - 10
Vermiculite	1318-00-9	1 - 5
Fiberglass (Continuous Filament)	65997-17-3	0 - 5

Composition Comments:

All concentrations are in percent by weight.

Raw material in this product contains respirable crystalline silica as an impurity. Independent testing of this product suggests that under most conditions of use, this product will not result in exposure to respirable crystalline silica that exceeds OSHA's Action Level, (AL) or Permissible Exposure Limit (PEL). However, actual concentrations of respirable silica may vary based on the conditions of use. Specific exposures can only be determined by workplace industrial hygiene testing.

4. First-aid measures

Inhalation Move injured person into fresh air and keep person calm under observation. If breathing is

difficult, give oxygen. Get medical attention.

Skin contact Wash with water and a pH neutral soap or a mild skin detergent. Get medical attention if

irritation develops and persists.

Eye contact Do not rub eyes. Flush thoroughly with water. If irritation occurs, get medical assistance.

Ingestion Practically non-toxic. Ingestion is not anticipated under normal working conditions. Rinse mouth thoroughly with water and give large amounts of water to people not unconscious. Never give

thoroughly with water and give large amounts of water to people not unconscious. Never give anything by mouth to an unconscious person. Get medical attention if symptoms occur. DO NOT

induce vomiting

Most important symptoms / effects, acute and delayed

Irritation of nose and throat. Irritation of eyes and mucous membranes. Dust may irritate throat

and respiratory system and cause coughing.

Indication of immediate medical attention and special treatment needed

Provide general supportive measures and treat symptomatically. Symptoms may be delayed.

General information Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media The product is non-combustible. Use fire-extinguishing media appropriate for surrounding materials.

Unsuitable extinguishing media Not applicable.

Specific hazards arising from

Specific hazards arising from No.

Not a fire hazard.

Special protective equipment and precautions for firefighters

Selection of respiratory protection for firefighting: follow the general fire precautions indicated in the workplace. Self-contained breathing apparatus, operated in positive pressure mode and full protective clothing must be worn in case of fire.

Fire-fighting equipment/instructions

Use standard firefighting procedures and consider the hazards of other involved materials. Move containers from fire area if you can do it without risk.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures Avoid inhalation of dust and contact with skin and eyes. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Use personal protection as recommended in Section 8 of the SDS.

Methods and materials for containment and cleaning up

Scrape up with shovels into a suitable container for recycle or disposal. Use methods to minimize the generation of nuisance dusts. For waste disposal, see Section 13 of the SDS.

7. Handling and Storage

Precautions for safe handling

Stack of material in a secure manner to prevent falling. Drywall is heavy and poses risks such as sprains and strains to the back, arms, shoulders and legs during lifting. Use work methods which minimize dust production. Cutting, crushing, sanding or grinding joint compound, drywall or other crystalline silica-bearing materials will release respirable crystalline silica. Avoid inhalation of dust and contact with skin and eyes. Do not use if material has spoiled and is moldy. Use only in well-ventilated areas. Observe good industrial hygiene practices.

Conditions for safety storage including any incompatibilities

Store in a cool, dry, well-ventilated place away from moisture and the outdoor elements of weather. Store away from incompatible materials. Protect product from physical damage. The Gypsum Association literature (GA-801) recommends storing board flat to avoid damaging edges, warping the board and the potential safety hazards of the board falling over. However, in other situations, storing the board flat may cause a tripping hazard or exceed floor load limits. If stacking board vertically, leave at least 4 inches from the wall to decrease the risk of falling board and no more than 6 inches to avoid too much lateral weight against the wall.

8. Exposure controls/personal protection

Occupational exposure limits

US. OSHA Components	Туре	Value	Form
Gypsum (CAS 13397-24-5)	PEL	5 mg/m³	Respirable.
Cellulose (CAS 9004-34-6)	PEL	15 mg/m³ 5 mg/m³ 15 mg/m³	Total dust. Respirable. Total dust.
Crystalline Silica (CAS 14808-60-7)	Action Level (25 µg/m3) PEL (50 µg/m³)	0.025 mg/m ³ 0.05 mg/m ³	Respirable. Respirable.

US. ACGIH Threshold Limit Values (TLV)

Components	Туре	Value	Form
Gypsum (CAS 13397-24-5)	TWA	10 mg/m3	Respirable.
Cellulose (CAS 9004-34-6)	TWA	10 mg/m3	
Crystalline Silica (CAS 14808-60-7)	TWA	o.o25 mg/m3	Respirable.
Fiberglass (Continuous Filament)	TWA	1 fibers/cm3	Fiber.
(CAS 65997-17-3)		5 mg/m3	Respirable.

US. NIOSH: Pocket Guide to Chemical Hazards

Components	Туре	Value	Form
Gypsum (CAS 13397-24-5)	TWA	5 mg/m3	Respirable.
Cellulose (CAS 9004-34-6)	TWA	10 mg/m3 5 mg/m3	Total Respirable.
Crystalline Silica (CAS 14808-60-7) Fiberglass (Continuous Filament)	0.05 mg/m3	O , O	Total Respirable.
(CAS 65997-17-3)		3 fibers/cm3	Fiber. (fibers with diameter ≥3.5 µm + length ≥10 µm)
		5 mg/m3	Fibers, total

Biological limit values No biological exposure limits noted for the ingredient(s).

Exposure guidelines Occupational exposure to nuisance dust (total and respirable) and respirable crystalline silica

should be monitored and controlled.

Appropriate engineering

controls

Tools and EquipmentUtilize methods to minimize dust production including pole sanders and/or sanders equipped

with vacuum capabilities whenever possible to maintain a dust level below the AL/TLV.

VentilationLocal and general exhaust ventilation sufficient to maintain a dust level below the AL/TLV

may be used.

Individual protection measures, such as personal protective equipment

Eye/face protectionANSI approved safety glasses or goggles.Skin/Hand protectionGloves, and protective clothing may be utilized.

Respiratory protection

A NIOSH approved particulate respirator is recommended if the PEL is exceeded.

OSHA's 29 CFR 1910.134 (Respiratory Protection Standard) must be followed whenever

work conditions require respirator use.

Thermal hazards Not applicable.

General hygiene When using, do not eat, drink or smoke. Wash hands after handling. Handle in accordance with

considerations good industrial hygiene and safety practice.

9. Physical and chemical properties

Appearance Solid, various colors.

Physical stateSolid.FormSolid.

Color Various colors. Core: white.

Odor None.

Odor threshold Not available.

pH 7

Flammability (solid/gas)

Vot applicable.

Not applicable.

Upper/lower flammability or

Not applicable.

explosive limits

Relative density Solubility(ies) $1.1 - 4 \text{ lb/ft}^3$ Solubility (water) $< 0.2 \% @20^{\circ}\text{C}$

10. Stability and reactivity

ReactivityThe product is stable and non-reactive under normal conditions of use, storage and

Chemical stability transport. Material is stable under normal conditions.

Possibility of hazardous reactions Hazardous polymerization does not occur. **Conditions to avoid Incompatible** Contact with incompatible materials.

materials

Hazardous decomposition Strong oxidizing agents. Strong acids. Ammonium salts. Fluorine. Aluminum. Sulfur

products oxides. Calcium oxides. Ammonia.

11. Toxicological information

Information on likely routes of exposure

Ingestion Not an anticipated route of exposure under normal working conditions. May cause

discomfort if swallowed. May cause irritation of the gastrointestinal tract.

Inhalation Overexposure to respirable crystalline silica may cause cancer by inhalation.

Skin contact Prolonged or repeated contact may dry skin and cause irritation.

Eye contact Dust may irritate the eyes.

Symptoms related to the physical, chemical and toxicological characteristics

Irritation of eyes and mucous membranes. Irritation of nose and throat. Dust may irritate

throat and respiratory system and cause coughing.

Information on toxicological effects

Acute toxicity May cause discomfort if swallowed. Dust Skin corrosion/irritation may cause mechanical irritation of skin. Serious eye damage/eye Dust in the eyes will cause irritation.

irritation

Respiratory or skin sensitization

Respiratory sensitization Not classified.

Skin sensitization Germ cell Not a skin sensitizer.

mutagenicity Not classified.

Carcinogenicity This product contains crystalline silica (quartz) as a naturally occurring impurity. The

International Agency for Research on Cancer (IARC) and the National Toxicology Program classify respirable crystalline silica as known human carcinogens. Independent testing of this product suggests that under most conditions of use, this product will not result in exposure to respirable crystalline silica that exceeds OSHA's Action Level, (AL) or Permissible Exposure Limit (PEL). Exposures to respirable crystalline silica at or above the

OSHA AL, or PEL are not expected during the recommended use of this product. However, actual concentrations of respirable silica may vary based on the conditions of use. Specific exposures can only be determined by workplace industrial hygiene testing.

IARC Monographs. Overall Evaluation of Carcinogenicity

Fiberglass (Continuous Filament) (CAS 65997-17-3) 3 Not classifiable as to carcinogenicity to humans.

NTP Report on Carcinogens

Reasonably Anticipated to be a Human Carcinogen. Fiberglass (Continuous Filament) (CAS 65997-17-3)

Reproductive toxicity Specific target organ toxicity -

single exposure

Specific target organ toxicity -

repeated exposure

Aspiration hazard Not classified.

Chronic effects Prolonged and routine inhalation of fine quartz dust can lead to the lung disease known as

silicosis. Pre-existing respiratory conditions including asthma and chronic lung disease might

be aggravated by exposure.

12. Ecological information

Ecotoxicity The product is not classified as environmentally hazardous.

No data available.

No data available.

Not classified

Persistence and degradability No data available. Bioaccumulative potential No data available.

Mobility in soil The product is slightly soluble in water.

Other adverse effects No data available.

13. Disposal considerations

Dispose in accordance with all applicable regulations. Do not discharge into drains, water Disposal instructions

courses or onto the ground.

The Waste code should be assigned in discussion between the user, the producer and the Hazardous waste code

waste disposal company.

Waste from residues / unused

products

Not applicable.

Empty containers should be taken to an approved waste handling site for recycling or Contaminated packaging

disposal. Since emptied containers may retain product residue, follow label warnings even

after container is emptied.

14. Transport information

DOT

Not regulated as dangerous goods.

IATA

Not regulated as dangerous goods.

IMDG

Not regulated as dangerous goods.

Transport in bulk according to Annex II of MARPOL 73/78 and

the IBC Code

15. Regulatory information

US federal regulations This product is not a "Hazardous Chemical" as defined by the OSHA Hazard Communication

Standard, 29 CFR 1910.1200.

All components are on the U.S. EPA TSCA Inventory List.

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D)

Not regulated.

US. OSHA Specifically Regulated Substances (29 CFR 1910.1001-1050)

Not listed.

CERCLA Hazardous Substance List (40 CFR 302.4)

Not listed.

Superfund Amendments and Reauthorization Act of 1986 (SARA)

Hazard categories Immediate Hazard - Yes

Delayed Hazard - Yes Fire Hazard - No Pressure Hazard - No Reactivity Hazard - No

SARA 302 Extremely hazardous substance

Not listed.
