

SUBMITTAL SHEET

Product(s): Trim-Tex Mud Set 350 Bull

Description: Trim-Tex Mud Set 350 Bull Corner Bead is designed to finish outside 90° drywall corners and provide a soft, rounded look. It is installed and bonded to the drywall with drywall compound.

Advantages: Does not require drywall setback. Made from rust proof, dent resistant PVC to reduce jobsite and handling damage.

Limitations: Product is designed for interior use.

Applicable Standards: Rigid PVC products made by Trim-Tex meet ASTM specifications D3678-97, D1784-03, C1047-99 and achieve a Class A rating for flame spread and smoke developed when tested under ASTM E84-10.

Surface Characteristics: Trim-Tex products are made from PVC. PVC does not support combustion and is self extinguishing when the source of flame or heat is removed.

Installation: Snip the bead to length and dry fit. Run your bead through a hopper to coat the under side of the bead with mud/compound or you can trowel or box a layer of mud/compound onto the drywall corner. Place your corner bead onto the mudded corner and press down with a mud knife or rolling tool. Wipe off the excess mud and finish mudding. Detailed installations instructions are included with each product.

Finishing: First coat of mud can be applied immediately. Finish mudding, sanding and painting as you normally would. Priming is not required. Always use a high quality paint. For ultimate bond, add Mud-Max to the first coat of mud.

Accessories: 847 Spray Adhesive, Staple Guns and Divergent Staples, Trim-Tex Sanding Blocks & Abrasive Products, Mud-Max Drywall Compound Additive, North by Honeywell -Safety Products distributed by Trim-Tex
