

January 01, 2017

Stabilit America, Inc. is committed to providing our customers with quality products and customer support after the sale. Part of that support is data and information relating to the installation and use of our products.

This letter is being provided as a response to your request for a Safety Data Sheet on our panels. In accordance with current statutes, fiberglass reinforced panels (FRP) that we provide do not require Safety Data Sheets.

Our panels are defined as “articles” by the Occupational Safety and Health Administration’s (OSHA) Hazard Communication Standard and do not present a health or physical hazard.

An article is defined in the OSHA standard as follows:

*“A manufactured item (i) which is formed to a specific shape or design during manufacturing; (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (iii) which does not release, or otherwise result in exposure to, a hazardous chemical, under normal conditions of use.”*

It is our hope that this has satisfied your inquiry. If there are further questions, or more information is required, please contact our Technical Services Manager at 1-800-238-5546.
